Ideas for the future.

FULLY AUTOMATED SMOKE STICK TRANSFER AND DEPOSITING STRAIGHT INTO THE SMOKING TROLLEY.

- Industrial sausage production.
- For collagen and peel-off casing in conjunction with PVLH 241 and FPVLH 242 AL system.
- Substantial cost reductions with every shift

Technology

- AST 340 automatic smoke stick transfer unit for automatically depositing smoke sticks with strings of sausages into smoking trolleys.
- Handles star-shaped and round smoke sticks.
- Accurately positioned depositing of the loaded smoke sticks into the smoking trolley due to innovative robot technology.

Quality

- Gentle smoke stick feeding ensures sausages are not damaged.
- Constructed in accordance with the most recent CE guidelines with exceptionally high hygiene and safety standards.
- Reproducible product quality due to automated handling.

Efficiency

- Continually high production output due to automation.
- Reduced costs by dispensing with up to 2 operators per shift.
- Fast smoking trolley loading facilitates a high production speed for the Handtmann AL line.
- Affords improved utilisation of the cooking/ smoking system due to more concentrated smoke stick hanging.
